PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience building and deploying cloud-hosted applications on **AWS EC2** using **Docker** containerization and **Jenkins CI/CD pipelines** triggered via **GitHub webhooks**. Comfortable across the stack in **Python, Linux**, and relational databases (**PostgreSQL/MySQL**), with additional exposure to networking fundamentals (**TCP/IP, DNS, TLS, HTTP**) through independent protocol-analysis work. Seeking an entry-level **DevOps Engineer / Cloud Infrastructure** role to apply automation, containerization, and CI/CD skills in a production environment.

CORE SKILLS

Cloud Platforms :	AWS (EC2)
Containerization :	Docker, Docker Compose, Kubernetes
CI/CD & Automation :	Jenkins, GitHub Actions, GitHub Webhooks, Terraform
Scripting & Programming :	Python, JavaScript, TypeScript, Go, C, C++, Java
Networking & Protocols :	TCP/IP, DNS, TLS/HTTP, Deep Packet Inspection, RESTful APIs, WebSockets, gRPC
Version Control :	Git, GitHub

EXPERIENCE

Full-Stack Developer | Freelance

May 2026 - Present

Golden Krust

Remote • Remote

- Built an **e-commerce platform** on **React 19/TypeScript** and **Python/Django REST Framework**, deployed with **Vite build tooling**.
- Designed a **PostgreSQL schema** using atomic transactions and snapshot pricing to guarantee billing data integrity.
- Implemented server-side time-validation logic to enforce business rules (24-hour order fulfillment windows).
- Built secure multi-part file upload handling with **Pillow**, enforcing size limits to prevent oversized payloads.

Technologies / Skills Used : React, TypeScript, Python, Django, PostgreSQL, Vite, Pillow

Technical Lead

Feb 2026 - Apr 2026

SKITECH INNOTHON 3.0 (National-Level Hackathon)

Indore, India

- Built and maintained the official event website using **React, TypeScript**, and **Tailwind CSS**.
- Coordinated judge evaluations and tracked scoring for **~500 participants**, managing data integrity across the review process.

Technologies / Skills Used : React, TypeScript, Tailwind CSS

PROJECTS

2-Tier Flask Application on AWS

May 2026 - Jun 2026

Personal Project

- Architected and deployed a **2-tier Flask/MySQL web application** on **AWS EC2**, containerized with **Docker** and **Docker Compose**.
- Built an automated **CI/CD pipeline** with **Jenkins** and **GitHub webhooks**, enabling hands-off deployment on every push — removing manual deploy steps from the workflow.
- Integrated **AI/ML/NLP** components to extend application functionality.

Technologies / Tools Used : Flask, MySQL, AWS EC2, Docker, Docker Compose, Jenkins

Python Network Traffic Processor & Stateful DPI Engine

Sep 2025 - Nov 2025

Personal Project

- Built a **Deep Packet Inspection** engine in **Python** that parses PCAP files and applies rule-based traffic filtering, with zero external dependencies.
- Implemented multi-layer protocol parsers spanning **Ethernet, IPv4, TCP/UDP, DNS**, and **TLS/HTTP**.
- Developed a configurable rules engine for filtering by **IP, domain, port**, and **application type**.

Technologies / Tools Used : Python, PCAP, Ethernet, IPv4, TCP, UDP, DNS, TLS, HTTP

EDUCATIONS

Shivajirao Kadam Institute of Technology and Management | Indore

Aug 2024 - 2028

B.Tech
